

DAVID CARAIVAN

Milton Keynes, Buckinghamshire MK64HR | 07466803600 | david_caraivan@yahoo.com

SUMMARY

I am a person with various skills in multiple domains within the digital world. Ensuring I can bring both quality, quantity, and functionality in what I am creating or fixing.

I am a skilled programmer with a few years of experience within different domains of programming. Such as apps, websites, and games. Also with a good understanding of Typescript, HTML, and Tailwind CSS.

My Graphic design skills include the efficient usage of photo editing softwares such as Photoshop, GIMP, and Paint.NET. I have the ability to create logos, thumbnails, textures, and more. At a high-quality level.

In the 3D space, I use softwares like Blender to create 3D models, animations, and renders. I pay attention to detail so my work is both functional and aesthetic.

Here is the portfolio page where I have the projects I've worked on so far:
